VERSION WITH MARKING TO SHOW CHANGES MADE

IN THE SPECIFICATION:

The paragraph beginning on page 3, line 24 bridging page 4, line 9, has been amended as follows:

The inventors of the present invention have already proposed specific compositions of [A] a copolymer of ethylene and α -olefin of 4 to 20 carbon atoms, [B] a copolymer of ethylene and α -olefin of 3 to 20 carbon atoms and [C-1] a high-density polyethylene, as the modifiers which can satisfy the above requirements (Japanese Patent Laid-Open Publication [No.273563/1999] No. 273563/1998). However, these compositions cannot always give the modified resin of well-balanced impact resistance and bending modulus of elasticity.
